

PRODUCT FACT SHEET

WHAT IS DEXARECTIC?

It has been 3 years in the research and development stage and we are finally able to release this breakthrough product to the Camel racing industry. Dexarectic is used in racing Camels as an aid anti-inflammatory and well as having a diuretic effect as well. It also supports the management in various conditions including rheumatic, allergic and dermatologic which are known to be responsive to anti-inflammatory corticosteroids.

HOW DOES IT WORK?

Dexarectic is indicated for the treatment of acute musculoskeletal inflammation in Camels as well as a diuretic.

WHY USE?

It is a dual purpose anti-inflammatory which also has a diuretic effect, these actions are essential when it comes to racing Camels. There has been other variations of this medication in this area before, but due to the advancement in technologies and new testing procedures these medications cannot be used in a timely manner and have a withholding period. Dexarectic can be used in full confidence and when used correctly within the treatment time frame you will be assured of great results. Dexarectic is an essential for racing Camels and should be used in any training and racing program.
