

# Enduro-BLAST

## Ultimate Performance Blast

Enduro-Blast has been scientifically developed to producing a significant increase in blood supply to muscles and the heart, and hence increases yet regulates the oxygen release of red blood cells and essential nutrient supply to these areas during racing and competition and training including hard work. It also improves the efficiency of the removal of waste products such as lactic acid, to delay the onset of muscle fatigue and therefore increase stamina which is essential for peak performance.

### Benefits:

- Increases blood flow
- Increases blood supply to muscle tissue
- Prevents heart strain
- Delays the onset of muscle fatigue and cramping
- Increases maximum energy capacity
- Improves performance
- Regulates oxygen release in red blood cells
- Reduces lactic acid
- Improves stamina
